Security and Protection

Safe Technology: Our secure server software (SSL 128-bit encryption) is the industry standard and among the best software available today for secure online transactions. This is the same security used by the largest banks such as Chase and Wells Fargo as well as industry leaders, Microsoft and IBM. It encrypts all of your personal information including your credit card number, name and address, so that it cannot be read as the information travels over the internet.

Any information we receive from players is kept in strict confidence. The UltimateBet player list is for our use only and will never be shared, exchanged or sold to any organization.

Good Luck and Enjoy the Game of Poker
