About Poker Stars:

PokerStars.com is a fun, safe place to play poker with people from around the world for real or play money. We realize there are plenty of places you can play poker over the Internet, but PokerStars is the only one where you'll be treated like the poker star you are! So we've put together a dedicated and professional service team, and the best online poker software with the most features to keep you playing at our poker site.

PokerStars is a registered legal business located in the Isle of Man, in the British Isles. We abide by the laws and regulations where we do business.

PokerStars is not an Internet casino. Unlike an Internet casino, you never play against the house; You always play against other real poker players from around the world.

## Banking

Best Deposits & Withdrawals Options

Credit card transactions are processed through Rational Entertainment Enterprises Ltd, Douglas Bay Complex, King Edward Road, IM3 IDZ Onchan, Isle of Man.

We are proud to offer the most popular poker games from cardrooms around the world such as Texas Hold'em, Omaha and Stud. Real money limits range from \$0.01/0.02 to \$200/\$400. Visit our [Poker Room Review page](#) for more details.

Poker Stars Accepts:

1. - Credit card (Visa, Mastercard, Prepaid Visa)
2. - eChecks and Instant checks
3. - Bank Wire
4. - Prepaid VisaCards
5. - MoneyBooker
6. - ClickandBuy
7. - Neteller
8. - WebMoney

## Security and Protection

All communications between our client software running on client computers and our servers is encrypted. It is important to note that strictly speaking, encryption itself does not guarantee privacy. For example, a site where pocket cards of all the players are transferred to everybody, is not secure regardless of encryption. That is why we have spent a lot of effort designing our security system and policies.

Poker Stars uses a deck of 52 cards can be shuffled in 52! ways. 52! is about 2<sup>225</sup> (to be precise, 80,658,175,170,943,878,571,660,636,856,404,000,000,000,000,000 ways). We use 249 random bits from both entropy sources (user input and thermal noise) to achieve an even and unpredictable statistical distribution.

Good Luck and Enjoy the Game of Poker
